Saleheen Uddin Sakin

Full Stack Developer

saleheen.sakin@gmail.com | +8801833410082

Github | Leetcode | Portfolio | LinkedIn

Skills

Languages: Javascript, Typescript, HTML, CSS

Technologies/Frameworks: ReactJS, NodeJS, Tailwind, Express, Redux, JWT

Databases: MongoDB, Mongoose

Projects

1. PaisaHiPaisa | Live | Github | Backend(Github)

   A web based mfs like app where users can send, withdraw and add money through agents. Admins can modify and manager users, agents and all transactions.

   - Role based access control with JWT and Cookies
   - REST API integration using RTK Query
   - State management with Redux Toolkit
   - Form validation using Zod
   - Atomic operations using transactions and used Aggregation for summary

   Technologies: React, Typescript, Redux ToolKit, Zod, JWT, RESTful API (Node + Express + MongoDB/Mongoose)

2. Blood Lagbe | Live | Github

   A full-stack web app for voluntary blood donation management

   - Anyone can find eligible (anyone who donated before last 90days) donors and call them
   - Registered users can sign up as a donor
   - Donors can edit their information & add their latest blood donation date

   Technologies: NextJS, Typescript, MongoDB, Tailwind, DaisyUI, Clerk

3. Library Management System | Live | Github | Backend(Github)

   A library management system where anyone can borrow books and update or remove from the list

   - REST API integration using RTK Query
   - State management with Redux Toolkit
   - Form validation using Zod and use of MongoDB Aggregation on Backend

   Technologies: React, Typescript, Redux ToolKit, Zod, RESTful API (Node + Express + MongoDB/Mongoose)

Education

BSc. in Computer Science & Engineering

Khulna University of Engineering & Technology,

Khulna, Bangladesh.

Grade/CGPA: 3.49

Level: 3, Term:1

Languages

Bengali(Native), English(Conversational)
